The World's Best Plants Scientifically Prepared for Better Gardens

ROSE BUSHES — SHRUBS — VINES — PERENNIALS — TREES AND PLANTS

THIS PRICE LIST "OUR SALESMAN"

By discontinuing salesmen and other overhead expenses, we have been able to reduce prices and yet at the same time, with your cooperation, to improve quality and service.

Place your Commitment now and secure the full benefit of the lowest prices in our history. These low prices are subject to revision at any time; supplies of all kinds are likely to rise, labor is sure to. With an increased demand, and a crop estimated to be 25% less than last year there will in all probability be price advances as the season progresses.

Our reservations of both stock and supplies, based on your commitment, is your assurance of supply and protection against price advances. We turned many late comers away during the past spring (1940).

WHAT ARE QUALITY PLANTS?

In the final analysis the quality of plants is determined entirely upon ability to deliver plants at your customer's garden with unimpaired vitality. Seal-Kraft and Seal-Pakt are far and away the best methods yet devised and yet they cost no more than many imitations that fall far short. Mother Nature makes no compromise with price labels, ignorance, carelessness or shabby work.

DESCRIPTIONS OF PACKAGES

Advantages of Seal Kraft, the Original Wax Coated Process

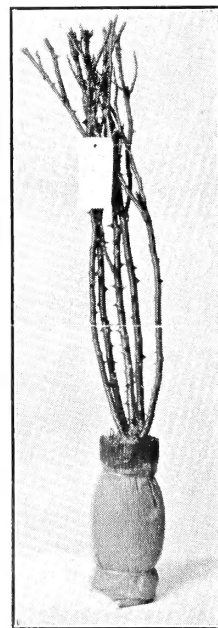

1. Plant completely sealed against loss of moisture.
2. Tops of plant in full view for customer appeal. Each plant labeled with 4-color variety label and cultural instructions.
4. Neat in appearance, easy to handle, clean, requires no watering
5. All insects and fungus are killed by Seal Kraft coating.
6. Seal Kraft is the only wax coating that affords complete protection against evaporation after planting.

Advantages of Seal Pakt, the Last Word in Plant Protection

1. A really scientifically sound plant package, not just another box.
2. Plants are completely sealed against loss of moisture.
3. Distinctive and attractive 4-color variety and package label add much to its saleability.
4. Plants properly pruned for planting.
5. Moisture proof cellophane window affords complete plant visibility without loss of moisture.
6. All packages are uniform in size, making for neatness, ease of handling and display.

PRICE AND VARIETY LIST NO. 41

SEAL-KRAFT AND SEAL-PAKT

ROSES — SHRUBS — VINES — PERENNIALS — HEDGING — FRUIT TREES, ETC.

Subject to terms and conditions (page 4), quotations are net wholesale per unit of one plant, except as noted, F. O. B. Manchester, Conn., or Jacksonville, Texas, freight at carload rate allowed to nearest Distribution Point. Full freight allowance on carloads (16,000 lbs.) to any point.

Recommended retail prices are shown as information only.

Stocks of popular varieties will be maintained, against commitments of estimated requirements only, through the active selling season, in storage at central distribution points. Cases cannot be broken in storage. Orders consisting of mixed cases or special assortments, also Special Brands D, E and F, shipped on firm orders only, but may enjoy the advantage of carload freight rates and storage at distribution points, if orders are placed sufficiently early.

EXPLANATION OF SYMBOLS IN PRICE AND VARIETY LISTS
TO BE USED IN ORDERING

In order to save time and simplify ordering, we have adopted a system of symbols for brands and types of packages, and numbers for varieties of plants. Regular BRANDS are designated by letters, as follows: GOLD SEAL BRAND — A; RED SEAL BRAND — B; BLUE SEAL BRAND — C. Letters preceding Variety Number indicate Brands in which that particular variety is available. Unless otherwise noted, varieties are available in all types of packages, being limited in brands only.

Types of Packages are designated as follows: Brand Letters not followed by letter “x” indicate SEAL-KRAFT Package; Brand Letters followed by “x” indicate SEAL-PAKT Package.

Example: A — Seal-Kraft Package; Ax — Seal-Pakt Package.

Number just preceding variety name in list is Variety Number.

How to Order. The above system of symbols and numbers are time and money savers, especially on telephone and telegraph orders. For example: When ordering one dozen Gold Seal Brand, Seal-Pakt Package, Columbia Rose Bushes, write — 1 doz. Ax-21.

Send your orders to Manchester, Conn., or Jacksonville, Texas, whichever is nearer to you.

This List Supersedes all Previous Issues. All prices are subject to change without notice.

ROSE BUSHES, ORNAMENTAL SHRUBS AND VINES

<i>Brand Symbol</i>	<i>Brand</i>	<i>Unit Cost</i>	<i>Recommended Retail</i>	<i>Approximate Units in Case</i>
SEAL-KRAFT (Wrapped)				
AA	Gold Seal Jumbo	\$.25	\$.50-.60	20
A	Gold Seal	.20	.40-.50	30
B	Red Seal	.15	.30-.40	35
C	Blue Seal	.12	.25-.30	40
D	Special	.10	.20-.25	45
E	Special	.085	.15-.20	
F	Special	.065	.10-.15	

Note: We especially recommend handling our regular brands, Gold, Red and Blue Seal. Our Special Brands D, E and F, are, however, handled and processed in the same careful manner as our regular Brands and represent the best value in their respective price ranges. They are, of course, smaller plants, but every one is alive. A small living plant has value; a large dead one has no value.

SEAL-PAKT (Tubes)				
Ax	Gold Seal	.25	.50-.65	12
Bx	Red Seal	.20	.35-.50	24
Cx	Blue Seal	.16	.25-.35	24-36

Note: Please make orders for full cases of one variety as far as possible and total orders in multiples of 24 units. See Rose Garden Assortment. Orders calling for less than full cases of a variety 10% extra.

SEAL-KRAFT ROSE GARDEN ASSORTMENTS

The following assortments serve a dual purpose by providing an assortment of the twelve most important varieties without the necessity of purchasing twelve full cases. They also stimulate large unit sales especially if some concession is made on the complete garden. A special display card with 4-color illustrations of each variety is provided with each order for ROSE GARDENS.

PERENNIALS SEAL-POTTED (PREPLANTED)

Our Seal-Potted system of merchandising perennials has been evolved after many years of experiments and experience. It has proven entirely satisfactory and perennials so handled not only arrive without the slightest deterioration but will actually improve in value and merchantability while on display. They may be handled with profit throughout the full planting season with many varieties coming into bloom as the season advances. See cuts showing blooms and root development.

This method also makes it possible to handle many varieties utterly impossible by the crude wrapping method. Seal-Potted Perennials are much superior to plants grown and displayed in clay pots.

Brand Symbol	Brand	Unit Cost	Recommended Retail	Units in Case
Seal-Potted				
Axx	Gold Seal	\$.15	\$.25-.30	24
Bxx	Red Seal	.12	.20-.25	24
Cxx	Blue Seal	.09	.15-.20	20

Each unit will bear a 4-color variety label with cultural instructions
Shipped 24 units in a carton

TERMS AND CONDITIONS OF SALE

Prices quoted are F. O. B. wholesale NET 30 DAYS from date of invoice. Full freight and storage allowance on carloads of 16,000 lbs., car load freight rate allowed to your nearest distribution point, as follows (early orders save freight charges):

Atlanta, Ga.	St. Paul, Minn.	St. Louis, Mo.	Denver, Colo.
Des Moines, Ia.	Chicago, Ill.	Cincinnati, Ohio	Helena, Mont.
Jacksonville, Fla.	Detroit, Mich.	El Paso, Texas	Memphis, Tenn.
New Orleans, La.	Philadelphia, Pa.	Los Angeles, Calif.	Raleigh, N. C.
New York City	Salt Lake City, Utah	Pittsburgh, Pa.	Seattle, Wash.
Richmond, Va.	Kansas City, Mo.	San Francisco, Calif.	Manchester, Conn.
			Jacksonville, Texas

Distribution Points and Storage. A vitally important factor enabling you to have when and as required plants of unimpaired vitality at minimum cost. To this end we ask your cooperation. If commitments are made sufficiently early, we will maintain, against your estimated requirements, plants in cold storage, which may be withdrawn in carton lots as needed. Stock may be so held in storage sufficiently far into the selling season to determine your exact requirements; any balance remaining of original commitment will be at the disposal of the C. E. Wilson Nurseries.

Credit. Those not having a commercial rating and wishing to establish credit with us should supply references and allow sufficient time for investigation. C. O. D. orders must be accompanied by cash for at least 25% of the total amount.

Complaints. We strive to avoid errors, but we are human! We will lean over backwards to adjust any fault of ours. Claims as to errors or quality of stock must be made in writing immediately upon receipt of shipment to have consideration.

Returned Shipments. Under no consideration return any plants to us without our authority. Returned plants are rarely of any value to us. We will not accept any unauthorized returned shipments. Stock withdrawn from storage at distribution points constitutes a bona fide sale and cannot be returned to storage or point of origin for credit.

Guarantee. Inasmuch as trees and plants are living organisms, subject to all the ills of life, and exposed to natural elements, errors, carelessness and neglect, over which we have no control, no guarantee should be made, but as a matter of business expediency we believe a guarantee of replacement good psychology. Therefore, we will honor our replacement guarantee as printed on labels of our various packages.

Your full cooperation, together with our system of growing, digging, processing and distribution insures complete customer satisfaction and in turn an increasing volume of business for you, not only in plants but allied lines as well.

HERE'S HOW:

1. To secure only the best in packaged Rose Bushes, Shrubs, etc.
2. To be protected against price rises.
3. To be assured of an adequate supply when you need it.

We do not require you to give us a hard and fast order to protect you against price rises. Just fill out and sign the estimate and contract form below, giving approximate quantities you will require for the season. This contract is of inestimable value to us in making the important prior preparations and in securing supplies to give you the best of quality and service. At the same time it will assure you of an adequate supply of the best when and as you want it. This contract may be canceled in writing by either party 30 days before initial shipment is made.

ESTIMATE AND CONTRACT TO C. E. WILSON NURSERIES

Manchester, Conn. **Jacksonville, Texas**

I, or we, hereby agree to handle exclusively the following nursery products of C. E. Wilson Nurseries in so far as they are able to supply during the season FALL _____, SPRING _____, according to terms and conditions on reverse side, which I, or we, have read, and furnish the following estimate of our requirements based on previous year's sales, for the information of C. E. Wilson Nurseries, enabling them to make adequate reservations to service us at the proper time.

Formal itemized purchase orders will be made for stock as required. Formal order for initial shipment enclosed or will be forwarded upon request.

This contract may be canceled in writing by either party up to but not later than 30 days prior to date for initial shipment.

QUALITY PLANTS

This phrase has been bally-hoed for generations by practically everyone who has sold plants. In some cases it has been sincere; in most cases, just parrot talk.

WHAT IS A QUALITY PLANT?

From a retail merchant's point of view it is a plant with eye and price appeal that will produce volume sales. But, above all, it must be delivered to the customer without loss of vitality; otherwise it will not produce the flowers or fruit, the sole reason for which it was purchased. It is this last factor that determines whether there will be repeat business.

The quality of plants, as with all living organisms, is an ever varying, invisible factor and can only be definitely established by results. The most we can hope to do is to conserve the God-given vitality developed in the plant while in the nursery.

A universal fallacy is that the methods of growing plants in the nursery is the only important factor that need be considered. The growing is important to be sure, but it is love's labor lost unless the plant arrives at its final destination with unimpaired vitality.

The most difficult and least understood factor is the handling, preparation and protection of the plant's vitality through the most critical period of its life cycle, the journey from nursery to garden. To overcome these difficulties so that plants might arrive at their journey's end in as near nursery fresh condition as possible, we developed our Seal-Kraft Process and our further refined and improved Seal-Pakt Evaporation-proof tube method. These processes and packages are seemingly the last word in plant protection and truly supply the missing link between nursery and garden.

Transferring plants from nursery to garden is in many respects similar to a person undergoing a major operation. Within the memory of people now living there was a time when a major operation was perilously close to being a death warrant. Science has developed practices and equipment changing all this. Seal-Kraft and Seal-Pakt have likewise made it possible to distribute, in an orderly manner, plants via the store counter and yet have them arrive at their final destination in better condition than has usually been possible heretofore direct from the nursery.

Good plants plus eternal vigilance, in the application of sound scientific principles is the only way by which the claim of **Quality** is justified. "A plant is no better than the package in which it travels."
